

Section 9000 – General Public and Organizational Relations

9100 Board-Community Relations

9100

The Board of Education recognizes the value of community involvement in the Grand Rapids Public Schools at all levels. A strong school/community relationship will help strengthen the total educational experience for all students. Therefore, it is the policy of the school district to keep the community fully informed about the schools and to provide access and meaningful opportunities for all citizens to participate in local building and district-wide activities and decisions.

The Superintendent shall seek ways to involve citizens in the work of the school District and to stimulate citizens to know more about the schools.

Student Community Activities and Performances

The Board encourages all students to participate in community activities insofar as such activities do not conflict with their school duties.
