LESSON TWO

Anne Frank was a young girl who grew up in Amsterdam, Holland during World War II. She recorded the story of her life by keeping a daily journal. Years later, her journal was found and published into a book entitled, The Diary of Anne Frank.

Anne Frank was born on June 12, 1929. Her story is important because she documented her life while in hiding. She and seven others were forced to live in the attic of a store to prevent being captured by Nazi soldiers during the war. Anne and her family were Jewish and were trying to avoid persecution. Therefore, her diary was written while she lived in an attic secretly hiding from the Nazi soldiers.

Her family was eventually found and arrested on August 4, 1944. Anne and her sister both died of typhoid in a German concentration camp in March, 1945. Her sister, Margot, was 19 years old and Anne was only 15. Anne's father, Otto, was the only member of the Frank family to survive the war.

Anne's memoirs are well known today. Over 25 million copies of the book, The Diary of Anne Frank have been sold around the world. The book seems to have a special appeal to teenagers because they are able to relate to the thoughts of a young girl much like themselves.
