Date

**THREE YEAR REINSPECTION
JULY 1, 2001**

This reinspection was done in accordance with AHERA Act 763.85, Part B. All known Asbestos Containing and all assumed Asbestos Containing Material listed in the Management Plan was visually inspected to determine if there has been a change in the condition of the material from an undamaged state, to one showing damage.

The visual inspection was performed by Bruce Johnson and Ron VanderZand on the entire building with the use of the Management Plan, along with the past reinspections and all of the 6 months surveillances, to determine if there has been changes in the physical condition of any ACM, and to assure that all past response actions and schedules were met.

For quick reference, the ASBESTOS LOCATIONS section gives an updated list of all known or assumed ACM locations found in this building. However, there may be ACM located behind walls, above ceilings, or in areas that are not accessible. If ACM is present in these areas, the condition of it is unknown and this should be a consideration before any remodeling or demolition is started.

Since the inside of this building has no friable ACM no assessment is necessary and we recommend all non-friable material be maintained under an operation and maintenance program.
