## Appendix to Analytical Report:

**Customer Contact:** Chris Decker

**Analysis:** ASTM D7391

This appendix seeks to promote greater understanding of any observations, exceptions, special instructions, or circumstances that the laboratory needs to communicate to the client concerning the above samples. The information below is used to help promote your ability to make the most informed decisions for you and your customers. Please note the following points of contact for any questions you may have.

**iATL Customer Service:** customerservice@iatl.com

**iATL Office Manager:** cdavis@iatl.com

**iATL Account Representative:** Shirley Clark

**Sample Matrix:**

**Exceptions Noted:** See Following Pages

### General Terms, Warrants, Limits, Qualifiers:

General information about iATL capabilities and client/laboratory relationships and responsibilities are spelled out in iATL policies that are listed at [www.iATL.com](http://www.iATL.com) and in our Quality Assurance Manual per ISO 17025 standard requirements. The information therein is a representation of iATL definitions and policies for turnaround times, sample submittal, collection media, blank definitions, quantification issues and limit of detection, analytical methods and procedures, sub-contracting policies, results reporting options, fees, terms, and discounts, confidentiality, sample archival and disposal, and data interpretation.

iATL warrants the test results to be of a precision normal for the type and methodology employed for each sample submitted. iATL disclaims any other warrants, expressed or implied, including warranty of fitness for a particular purpose and warranty of merchantability. iATL accepts no legal responsibility for the purpose for which the client uses test results. Any analytical work performed must be governed by our Standard Terms and Conditions. Prices, methods and detection limits may be changed without notification. Please contact your Customer Service Representative for the most current information.

This confidential report relates only to those item(s) tested and does not represent an endorsement by NIST-NVLAP, AIHA LAP LLC, or any agency of local, state or province governments nor of any agency of the U.S. government.

This report shall not be reproduced except in full, without written approval of the laboratory.

### Information Pertinent to this Report:

Analysis by ASTM D7391

Certification: EMLAP AIHA-LAP, LLC No. 100188

Total Counts = Raw Count multiplied by the Counting Factor (4) associated with this filter type.

Debris loading indicates a level of unidentified background particulate.

Levels range from 0 to 5, where a level of 0 is consistent with a blank sample and a level of 5 is an overloaded sample. Loading levels of 2, 3, or 4 may cause a negative bias in counting due to interfering particulate.

A 'void' concentration means that the sample has been overloaded with particulate matter and could not be reliably analyzed.

Although not officially mandated, the submittal of blanks is a scientifically sound practice.

All results are based on the samples as received at the lab. iATL assumes that appropriate sampling methods have been used and that all the data upon which these results are based have been accurately supplied by the client.

Results are calculated from the total number of identified mold spores. Interpretation is left to the company / person who sampled or inspected the facility tested. All biological samples have inherent variability and the presence of a few taxus in a small number should be considered normal.

iATL utilizes 1000X magnification (oil) to perform qualitative analysis.

Analytical Sensitivity based upon a Method Detection Limit of 1 spore, Counting Factor of 4, and Sampling Volume of 75L is 53 spores / M<sup>3</sup>.

**Disclaimers / Qualifiers:**

There may be some samples in this project that have a "NOTE:" associated with a sample result. We use added disclaimers or qualifiers to inform the client about something that requires further explanation. Here is a complete list with highlighted disclaimers pertinent to this project. For a full explanation of these and other disclaimers, please inquire at [customerservice@iatl.com](mailto:customerservice@iatl.com).
